

YOUR COFFEE, THE WAY YOU WANT IT!

Every morning, as you hold your simmering cup of coffee and the newspaper, as you relish the rich aroma and taste, do you ever wonder how the coffee stays so perfect and fresh? We make sure that it does. We are Ecotact—the coffee preservers who ensure that the coffee beans remain fresh. We represent the ultimate in quality and reliability with unique packaging solutions for bags. With partners across the globe, and domestic offices in Kolkata and Delhi, we are known for our commitment towards quality and class.

PACKED IN PERFECTION

True to its name, a union of the words “Ecological” and “Intact”, Ecotact bags are used for green coffee, cocoa, tea, sugar and other agro-based products for global markets. They are multilayered hermetically sealed ecological bags, manufactured using special technology to preserve the natural freshness of farms. The packaging uses FDA and European EU food grade certified materials only.

DELIVERED BY THE BEST

Ecotact belongs to Aashirvad International, India, an ISO 9001:2008 company and the Indian counterpart of an international value chain partnership. Based in India, with its corporate head office in New Delhi, Aashirvad International has a steady growth rate. Hermetic Packaging Solutions

WRAPPED IN TRUST

Ecotact's exclusive 9-layer packaging keeps your food grains farm fresh and preserves sensitive food and vitamin content, so that you get the healthiest nourishment always.

9 layers of packaging to keep your food grains farm fresh

PRODUCTS

MULTILAYERED HERMETIC STORAGE BAGS

The ecological plastic bags from Ecotact are extremely strong and have high oxygen and moisture barrier properties to seal the freshness of green coffee inside throughout the supply chain and storage. Loaded with the following properties, the multilayered hermetic storage bags are instrumental in keeping your coffee beans absolutely fresh.

- Locks-in aroma • Protects sensitive food and vitamin content • Maintains flavour and inherent quality
- Hydrocarbon free • Excellent forming • Heat maintaining properties • High temperature tolerance (-30°C to 90°C)
- High resistance to oil and solvents • Easy recyclability and eco-friendly structure
- Provides excellent transparency.

Sizes

- ECOTACT 80 - 762mm (W) x 1270mm (L)
- ECOTACT 40 - 558.80mm (W) x 939.80mm (L)
- More custom sizes available

MULTILAYERED HERMETIC SAMPLER BAGS

Sampling of green coffee by coffee producers/millers/traders/roasters is one of the most critical tasks in the supply chain of coffee industry. The green coffee which needs to reach the roasters ought to be in farm fresh condition with optimum level of moisture and aroma. But more often than not, the stakeholders tend to use substandard bags with unverified quality. This leads to buyers rejecting the best of the coffee or fetching lowly prices.

Ecotact's new multilayered hermetic sampler bags with gusset keeps the green coffee intact in its farm fresh condition. The coffee reaches the roasters and other stakeholders in the value chain in the best possible condition with optimum moisture levels and aroma. The sampler bags act as a high barrier protection from oxygen and moisture. They can be sealed normally by hand or by any simple sealing machine and have templates mentioning branding and content by the sender.

Size

- ECOTACT 1.0 - 180mm(W) x 267mm(L) x Gusset [45mm+45mm]
- ECOTACT 0.5 - 150mm(W) x 245mm(L) x Gusset [35mm+35mm]
- ECOTACT 5.0 & ECOTACT 0.3 with customised printing available

ECOTACT HERMETIC FIBC BAGS

Ecotact Hermetic Flexible Intermediate Bulk Container Bags are high quality food grade polypropylene bags with multilayered high capacity hermetic liners inside for intermediate intact storage and transportation of coffee in bulk. These high capacity bags have special baffles inside to keep the shape of the bags intact for long term storage and repeat usage. The bags come with easy to insert Top Spout and easy to remove Bottom Spout. These bags save a lot of space in scarce warehouse spaces and keep the green coffee intact and farm fresh for a considerably long time. Increasing number of international shipments have now started to take place in 20ft containers filled with 20 ECOTACT 1T bags that are easily loaded and unloaded by the Fork Lifts. Easy handling of bulk coffee in these bags, for storage and transportation, saves a lot of time, energy and money.

Sizes

- ECOTACT 1T • ECOTACT 1.5T • ECOTACT 2T

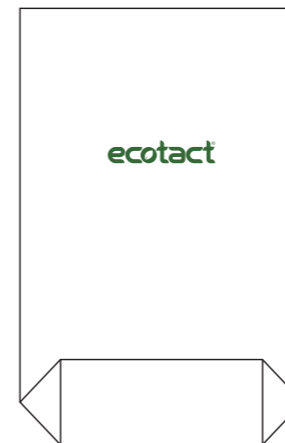

ECOTACT SUPER GREEN HERMETIC BAGS:

The super green hermetic bags are an intertwined combination of primary bag - 9 layered recyclable hermetic food grade plastic bag and a secondary bag - high strength eco-friendly compostable Kraft paper bags. The outermost layer gives an option of customized flexographic colourful printing and the inner bag gives hermetic protection for the green coffee/food grains packed inside. The satchel bottomed combination bag is a super green smart solution for long term protection of premium food grains without the use of pesticide/insecticide. This is a sustainable ready-to-use bag which does not require a secondary packing, thus making it an efficient, economical and an eco-friendly packing solution.

Sizes:

- ECOTACT SUPERGREEN 40 – For 25 – 35 kg of green coffee
- More custom sizes available

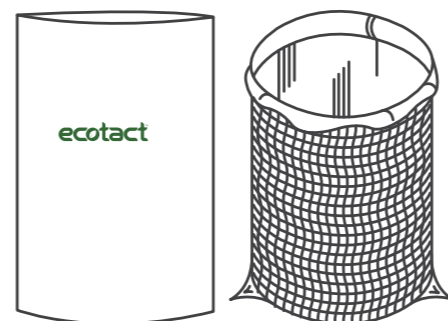

ECOTACT STERILE VACUUM BAGS

The multilayered plastic bags are high barrier, strong and flexible, fit for preserving food grains and green coffee for longer duration. The bags are sealed scientifically after extracting the excess air. The bags are space convenient and can easily be packed into the corrugated cartons wherein branding of green coffee can be done in most attractive ways.

Ecotact Sterile Vacuum packaging bags safeguard grains against all the harmful objects that can spoil them. The complete vacuum packaging solution includes Ecotact Sterile Vacuum bags, Vacuum and Sealing Machine for food grains, and stainless steel moulds for proper shape of the bag.

Sizes:

- ECOTACT STERILE 20 - 522mm (W) x 720mm (L)
- ECOTACT STERILE 15 - 400mm (W) x 600mm (L) x Gusset (60mm + 60mm)
- More custom sizes available
